

◀ DingoTone ▶

Seventies Quad-opamp Overdrive

This professional effects pedal was hand made in North America from premium components.

This pedal is designed to operate from 12DVC. The “9VDC Mod” can be performed by bridging the two points shown.

Please note that performing this mod voids the warranty!

Warranty

This pedal is covered by a 12 months replacement warranty. As long as the pedal is not physically or electrically damaged but has a fault due to parts or labour within 12 months of the initial purchase date, we will replace the pedal at no cost to you. Shipping to DingoTone is at the owners cost. No warranty claims will be accepted without a Return Authorization (email us for details).

The warranty is void if any modification or repair is done by anyone other than DingoTone, or if the pedal has been disassembled. There are no user serviceable parts inside.

Under no circumstances will DingoTone be responsible for consequential loss or damage. At all. Ever. We'll replace your pedal if it fails because of a defect. But that's it.
